

Where fumes, smells or dust occur, the Miniveyor Air VAF fans can move contaminated air out of a confined space or building. They effectively exhaust fumes, ventilate confined spaces, and increase the flow of fresh air.

The Miniveyor Air range are tough! The rugged VAF ventilators easily withstand blows without denting, giving less downtime and greater productivity and come with an industry leading 10 year warranty on the body.

VAF-300 12" (300mm)

Less Downtime:

The polythene casing is resistant to the normal knocks and bangs of everyday use that can stop a sheet metal fan. Metal fans often dent which can obstruct the fan blade. The Miniveyor Air VAF units easily withstand blows without denting, giving less downtime and greater productivity.

Greater Value:

The casing are corrosion free and unlike metal fans will not rust when they are dented, chipped or scratched. They simply last longer and offer greater value for money.

Ideal for Welding Fume Extraction, Concrete Cutting, Flood Remediation, Confined Space Working, Construction and Construction Equipment Rental

VAF-200 8" (200mm)

VAF-400 16" (400mm)

VAF-200

Only 7.5 kg the VAF-200 is our smallest and newest Ventilator. Don't be fooled by it's size though as the VAF-200 has an impressive 1350 m³/hr (800 CFM) airflow and is available in either 110V Or 230V.

VAF-300

Our most popular Ventilator, available in either 110V or 230V. Too much dust to see safely? Filter out the dust by using our 200 litre filter in combination with the VAF-300

VAF-300P-FRL

The air driven version of our most popular blower comes complete with a filter regulator and lubricator fitted as standard and is ideal when you need an intrinsically safe blower

VAF-400

Available In 110 & 230V. For maximum airflow the VAF- 400 provides a massive 7500 m³ per hour (4400 CFM) air flow.

	VAF-200	VAF-300	VAF-300P-FRL	VAF-400

Flexible Duct Diameter	200 mm (8")	300 mm (12")	300 mm (12")	400 mm (16")

Application Examples

Welding - Remove the fumes and smoke away from the working area. Perfect for ship repair!

Concrete cutting - Remove the dust to see what you are doing when cutting bricks and concrete with diamond saws.

Flood Damage - Dry out flooded buildings, blowing clean dry air into a building or extracting damp humid air out of a building.

Confined Space Working - Clean and change the air to provide a safe, comfortable working environment.
